University of Houston

Bachelor of Science in Computer Science

Houston, TX

Expected June 2026

PROJECTS

Post Office Web App | *React, Node.js, MySQL*

April 2024

- Developed a full-stack management system with distinct user roles (customer, employee, admin) to streamline post office operations.
- Engineered a RESTful API using Node.js to manage package tracking, inventory, user data, and vehicle fleets across multiple locations.
- Built a responsive and interactive user interface with React, featuring dynamic dashboards for administrators and real-time delivery status updates.
- Deployed the application using Vercel for the front-end and Render for the back-end, ensuring a scalable and continuously available service.

Virtual Pet Game | *C++*

June 2021

- Developed a fun simulation where players can form a bond with their virtual pet, fostering a sense of responsibility and care.
- Implemented core game mechanics and a 2D graphical interface using C++.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio
